ALTA Exit Seal®

Submittal Form

ALTA PRODUCTS LLC
Innovation That Works.™

SPECIFICATIONS

Materials:

ALTA Exit Seals® are made of an all-aluminum body. All series incorporate the weather-tight gasket seal.

Function:

ALTA Exit Seals® are lightweight, weather-tight and easy to install. The single installation of this product eliminates the costly leak repairs associated with individual penetrations when installed on the ALTA Products LLC™ Pipe Chase Housing and Curb. The gasket's flexibility allows for the movement of pentrants caused by temperature changes, structural movements or vibration without sacrificing its seal or risking cracking.

Temperature:

-65°F (intermittent -100°F) to +450°F (intermittent to +500°F)

Type of existing materials:

The single line design of the product allows for compatibility with a wide variety of materials. However, bundled materials should be either sleeved or seperated to ensure proper installation. For available sizes and part numbers, please call ALTA Products LLC ™ at (815) 520-3004. Custom sizes can also be accommodated upon request.

Exit Seal Sizes:

Range from 3.0" OD and up
